EDUCATION

Jain (Deemed-to-be University)

B.Tech in Computer Science Engineering (IoT) — CGPA: 8.37/10

Bengaluru, Karnataka

2024 – 2028

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript

Web Development: React.js, HTML5, Vite, CSS3, Tailwind CSS

Databases & Cloud: Firebase Realtime Database, Supabase

IoT & Embedded Systems: ESP32, Bluetooth Low Energy (BLE), IoT Prototyping

Tools & Platforms: Git, GitHub, VS Code, Arduino IDE, Vercel, Google Sheets

PROJECTS

Smart IoT-Based Classroom Attendance System | *ESP32, BLE, Firebase Database*

[GitHub](#)

- Developed an IoT-based attendance management system using ESP32 and BLE.
- Automatically detected registered student devices and updated attendance records.
- Integrated Firebase Realtime Database for cloud-based attendance storage and synchronization.
- Designed a responsive dashboard for attendance monitoring and analytics.

OneRoof Real Estate Aggregator | *React, TypeScript, Supabase, Tailwind CSS*

[GitHub](#)

- Developed a real estate aggregation platform for browsing and exploring property listings.
- Built a responsive frontend using React, TypeScript, and Tailwind CSS.
- Integrated Supabase for backend services and property data management.
- Implemented advanced property search, filtering, and map-based exploration features.

Queue Monitoring System | *JavaScript, HTML, CSS, Google Sheets*

[GitHub](#)

- Built a queue monitoring dashboard for occupancy tracking and crowd analytics.
- Integrated Google Sheets for cloud-based data collection and reporting.
- Implemented trend analysis and interactive data visualization features.
- Provided real-time visibility into queue conditions through a responsive dashboard.
